MORAD AHMED HELMY

Mobile Application Developer (Flutter & Android) | Junior Network Engineer

Assiut, Egypt | +20 106 223 9634 | morad3ayada@gmail.com | linkedin :MoradAyada | github.com: morad3ayada

PROFESSIONAL SUMMARY

Mobile Application Developer with 2+ years of hands-on experience designing, building, and shipping cross-platform applications using Flutter, Kotlin, and .NET-integrated backends. Proven track record delivering production software live on the Apple App Store and Google Play, including multi-role platforms for school transportation and educational institution management. Cisco-certified in networking and cybersecurity fundamentals (CCST Networking), with practical experience supporting campus network infrastructure. Skilled in RESTful API integration, Firebase, real-time data synchronization, and responsive UI/UX design following Material Design principles. Strong collaborator with experience in Agile, Git-based version control, and full mobile development lifecycle from concept through deployment.

TECHNICAL SKILLS

Programming Languages: Kotlin, Dart, Java, C#
Mobile Development: Flutter, Android SDK, Cross-Platform Development, Responsive UI, State Management, Push Notifications, RESTful API Integration
Backend & Databases: .NET (Backend Integration), Firebase Firestore, SQLite, Room Database, RESTful API Design
Design & UI/UX: Figma, Adobe XD, Material Design Guidelines
Tools & Practices: Git, GitHub, Android Studio, Agile Collaboration, Version Control
Networking & Security: Network Fundamentals (TCP/IP, OSI Model), LAN/WAN Configuration & Troubleshooting, Router & Switch Configuration, Network Security & Threat Mitigation, Ethical Hacking & Penetration Testing Basics, Vulnerability Assessment, Security Administration & Access Control, Cybersecurity Risk Management, Basic Data Analysis

PROFESSIONAL EXPERIENCE

Freelance Mobile Application Developer | *Self-Employed* *March 2024 – Present*

- Design and develop native and cross-platform Android applications using Kotlin and Flutter for a range of client requirements.
- Integrate Firebase, RESTful APIs, and SQLite to enable real-time data handling, offline functionality, and reliable data persistence.
- Optimize application performance and UI/UX to improve usability, responsiveness, and end-user satisfaction.

VOLUNTEERING

Social Media Lead | *YLY (Youth Leadership and Development Organization)* *March 2022 – March 2023*

- Led the social media team, overseeing content creation and publishing across platforms to grow audience engagement.
- Directed the development of social media strategies aimed at boosting reach and engagement.
- Coordinated with a cross-functional team to execute campaigns and track performance metrics.

TRAINING & DEVELOPMENT

Software Trainee – Mobile Application Development | *Assiut Petroleum Company* *Jul 2026 – Aug 2026*

- Completed a hands-on software training program specialized in mobile application development.
- Wrote and contributed functional code to a real mobile application project within a corporate environment.
- Applied Flutter and Kotlin development skills under professional engineering standards and practices.

Trainee – Mobile Application Development Track | *Digital Egypt Pioneers Initiative (DEPI)* *Nov 2024 – Apr 2025*

- Completed intensive, structured training in mobile application development covering Java, Kotlin, Dart, Flutter, Android SDK, RESTful APIs, Firebase, SQLite, and Room Database.
- Built and delivered three functional applications — a To-Do List App, Tasbeeh App, and Weather App — with emphasis on UI/UX design and performance optimization.
- Strengthened version control and collaborative development workflows using Git and GitHub.

COMPETITIONS & CHALLENGES

Mobile Developer – Team Participant | *Africa Tech Challenge* *Jun 2025 – Aug 2025*

- Participated as a Mobile Developer within a team competing in a technical challenge focused on building a mobile solution.
- Contributed to designing and prototyping the mobile application under competitive time constraints.
- Collaborated with a cross-functional team to deliver a working solution within the challenge timeline.

KEY PROJECTS

Notika – School Transportation Management System | *Live on Apple App Store & Google Play*

- Co-developed a full-scale transportation management platform connecting five user roles — students, teachers, parents, drivers, and transport supervisors — within a single unified system, similar to a school bus transportation service.

- Built the cross-platform mobile application using Flutter, integrated with a .NET backend for data management, business logic, and API services.
- Published and maintain the application on both the Apple App Store and Google Play Store.

App Store | *Google Play*

Omia – Educational Institution Management System | *Live on Google Play*

- Developed a mobile platform for educational institutions connecting students, teachers, teaching assistants, parents, and institution accounts within one unified system.
- Implemented role-based access so each user type (student, teacher, assistant, parent, institution) accesses relevant tools and data.
- Published and maintain the application on the Google Play Store.

Google Play

Safra – Food Delivery Application | *Flutter, RESTful API, Firebase*

- Built a food ordering and delivery mobile app allowing users to browse menus, place orders, and track delivery status to their location in real time.
- Integrated RESTful APIs and Firebase for menu management, order processing, and real-time status synchronization.
- Designed an intuitive, responsive ordering flow following Material Design guidelines.

HMS – Healthcare & Clinic Management System | *Flutter, RESTful API, Firebase*

- Developed a healthcare mobile app allowing doctors to set clinic schedules and define available appointment slots and daily patient capacity.
- Enabled patients to view doctor availability and book clinic appointments directly through the app.
- Implemented automated appointment reminder notifications to reduce missed visits.
- Implemented role-based access control providing tailored views for doctors and patients.

Clinical Note & Medical Image Diagnosis – AI Clinical Decision Support System | *Python, Deep Learning, NLP*

- Built an AI-powered clinical decision support system combining chest X-ray image analysis with automated clinical documentation to assist radiologists and physicians.
- Developed a deep learning model for chest X-ray classification to help detect and highlight potential abnormalities.
- Implemented an automated clinical note generation module to streamline diagnostic reporting workflows.

Nabbehni – Medication Reminder Application | *Flutter, Firebase Firestore*

- Developed a reminder-based mobile app to help users manage medication schedules effectively.
- Integrated Firebase Firestore for real-time data storage and cross-device synchronization.
- Designed an intuitive, responsive interface following Material Design guidelines.

Smart Irrigation App | *Flutter, Sensor Integration*

- Developed a smart irrigation application to monitor real-time water tank levels through sensor integration.
- Built backend logic to receive and process sensor data, enabling live in-app updates.
- Designed a user-friendly interface with clear visual indicators for water levels and alerts.

Thamarat – Sales & Office Management App | *Flutter, RESTful API*

- Built a Flutter-based application to manage sales and distribution of fruits and vegetables.
- Integrated a custom RESTful API for order management, product listings, and transaction history.

Campus Network Support – ATIU | *Assiut Technological University (Egyptian-German), Networking Project*

- Assisted in building and configuring the campus network infrastructure for Assiut Technological University (ATIU).
- Applied CCST-level networking fundamentals including LAN setup, device configuration, and basic network troubleshooting.
- Supported connectivity and network reliability efforts in a real-world institutional environment.

COURSES & CERTIFICATIONS

Mobile Development: Mobile App Developer — Digital Egypt Pioneers Program (MCIT); Flutter & Dart – The Complete Guide (Udemy); Android App Development with Kotlin (Udacity); UI/UX Design for Mobile Apps (Coursera); Advanced Java Programming (LinkedIn Learning); Learning Kotlin for Android (Maharh-Tech)

Networking & Cybersecurity (Cisco Networking Academy): Cisco Certified Support Technician (CCST) Networking; Ethical Hacker; Networking Essentials; Cybersecurity Essentials; Introduction to Cybersecurity; Cybersecurity Administration; Network Security Basics; Introduction to Data Science

LANGUAGES

Arabic: Native
English: Very Good (Reading, Writing, Conversation)
